Serial No 4

No. 9253 dated 5th Aug, 1925,
from the Dir, Ne

Submits proposals for the release of the keep of the Instructors etc of the Chemicajendra Technical Institute.

1) The proposals already submitted by the Director in this respect are now before the first member. Sentence 2 of his letter the Director says that since the submission of his previous proposals, he has taken opportunity once more of examining the working of the Institute in thorough detail and seeing what further remission is needed. This indicates that he has modified to some extent his previous proposals which are pending the orders of the first member.

Submd for orders.

5) The Proposition statement has been verified under "Present scale".

2. The following three appointments sanctioned temporarily in Government Order 4750-1/I&C.4-23-5 dated 7th February 1924 have not been distinctly shown as temporary in the Proposition statement:-

(a) One Mechanic on Rs.45

(b) One additional Clerk on Rs.30

(c) One Sweeper on Rs.10

3. The net increase per mensem is erroneously worked out in the Proposition statement as Rs.108 9/10 per mensem. It ought to be Rs.110 7/30. The mistake is due to the increase of Rs.2/3 being wrongly shown under "decrease" against "Cabinet instructor on Rs.46".

For Comptroller.

6) Submit with reference to the orders of the First Member in para 3 of the notes.

A — of pay proposed to the Instructors etc. of the Institute. The Dr. has not so far replied [illegible] in the matter

The Dr. has separately sent up with his letter No 717/9 19th Jan. 1926 a copy of the resolutions of the ~~on the subject held on 13th Nov 1926 in which a resolution has been passed~~ held on 13th Nov. 26, one of which relate to the revision of the establishment of the Institute. According to the resolution, the committee ~~is of opinion that the~~ agree with the proposals of the Dr. of Dte with the modification that the pay of the Machine Shop Foreman be fixed at Rs 40-4-60 instead of Rs 40-2-50 as recommended by the Dr. of Dte.

The Dr's proposals are contained in the proposition Slt. flagged A and they have been verified by the comptr. and found to result in an extra expenditure of Rs 110/- p.m. If the recommendation of the E.I.D. committee to alter ~~the pay of the~~ the pay proposed to the Foreman to 40-4-60 is approved the extra cost will be about Rs 117/- p.m ($110\frac{7}{30} + 6\frac{2}{3}$)

Put up for orders

Initd 24.1.27

The reorgn of the Chamarajendra Technical Institute has been pending very long for one reason or another.

para 5 of the Notes

2 in linked file —

WD 01229—GPB—37,500—1-9-26

General and Revenue Secretariat | File No. | of 192

Serial No.

The Dir has not yet sent a reply to our letter d. 20th Nov 1925 and subsequent reminders thereon, requesting him to forward the opinion of the Advisory Committee on the revision of the scales of pay, proposed by the Dept. (Please see Mr D'Souza's letter No - d. 5th Sept 1925.)

Flag D.

It is however, seen from the copy of the Proceedings of the meeting of the Advisory Committee received with the Dir's letter No - d. 19th Jan 1927, that the Committee have accepted the proposals of the Dept with two modifications: one is that they propose to fix the foreman's Pay at 40-4-60 instead of at, 40-2-50 proposed by the Dir. The other modification is that they recommend the sanction of bonus to the Workshop Section, while the Dir (Mr D'Souza) is not in favour of it. Mr D'Souza has explained why he considers the scheme of bonus, as not suited to the training section of the C.T.I in Page 3 of his letter d. 5th Sept 1925 mentioned above.

Flag C....
(in file binder)

This may be accepted

The proposals involve an additional expenditure of Rs 117/- p.m. It does not seem advisable to sanction a scheme of bonus on the output in the Workshop Section, for the reasons given by the Dept. The supporting statement has been verified by the Comptr: and

NOTE—Contn. Sheet

Serial No

they may now be sanctioned as indicated above. If Secy may be consulted.

(Another point dealt with in this file, is the approval of Govt to be conveyed to the Draft Prospectus of the Institute prepared by the Supdt. As the Draft which he sent up was incorrect in particulars and not according to standing orders, it was returned, for retransmission in a revised form, on the 5th March 1926. It has not yet been received in a revised form: reminders are being issued regularly. The Dir will be requested to send it up before the end of this month, without fail).

Subt for perusal & orders with previous refns (Please see Dewans minute?)

Secy D)

CWP
14/2/27.

The question of reorganisation has been pending for a very long time - chiefly owing to delay in getting the opinion of the Advisory Committee. This has now been secured, and the Committee have accepted the proposals with two small modifications.

There can be no question about the need for reorganisation. It has been frankly stated that the paying the instructors

NOTE— Contn. Sheet

Serial No.

is so inadequate that they have lost heart in their work, and have become objects of derision to their pupils.

The proposals put by the Director involve an additional expense of 110 7/30 Rs per month. With the modifications proposed by the Committee (giving the Foremen 60-4-80 instead of 40-2-50) the addl cost will be Rs 117 (very nearly). The effect will be to give the staff a small present increment, and ensure an even flow of promotion in future. The details are in the Proposition Statement on the file, which has been verified by the Comptr. The proposals may be approved. A demand for an addl grant of Rs 351 for the remaining 3 months of the year (assuming that the reorganisation will have effect from next month) will have to be placed before the Legislative Council.

Flag A

It must be noted that the Addl. Committee propose the grant of bonuses in opposition to the recommendation of the Director. The Dir's reasons for negativing bonuses appear entitled to weight, & may be accepted.

The question of enhanced grant for scholarships is at present under consideration, and need not be mixed

NOTE—Contn. Sheet

GOVERNMENT OF MYSORE

No. Enc.

CHAMARAJENDRA TECHNICAL INSTITUTE,

MYSORE 11th November 1924.19

From

" C O P Y " for information.

HAROLD G. ALDERTON, ESQ.,

Superintendent, ~~Principal~~,

CHAMARAJENDRA TECHNICAL INSTITUTE,

MYSORE.

No: 873/381

To

The Director of Industries & Commerce in Mysore,

B a n g a l o r e .

Sir,

The Instructors of this Institute have made a combined appeal expressing their difficulties caused through the very low standard of their pay. In order to obtain sufficient food for themselves and their family, they are forced to obtain additional work outside the Institute, in consequence of which they are constantly worried by outside circumstances instead of putting their whole energy into their work here. Many of them are very seriously in debt and their condition is most unhappy.

There is considerable truth in their assertion. The scales of pay are those fixed in Government order of 1913, since which time other rates of pay have very much increased, and in comparison with rates made to daily workmen and fixed by the D.P.W. their scale is very inferior.

In addition to the dignity of their position as Instructors they comprise the most skilled artisans of the locality, and in common justice, their remuneration should be raised to, at least, the level of the earnings of local workmen,

In May 1924, a scheme was proposed to give a bonus on the work turned out by them in order to encourage the earnest worker and give him a benefit beyond the slacker, according to his endeavours. The seheme has not however met with favour, although it is still considered better adapted to meet the special circumstances of this Institute.

However

However, it is most necessary that urgent action is taken to remedy the aforesaid difficulties of the Instructors and I request that the matter may be sympathetically placed before Government at a very early date.

A comparative list of the present and proposed scale of pay is enclosed for reference. It is considered that those in the lower grades most urgently need redress. Their work is in many cases equal to those with higher pay but a general percentage rise would not satisfactorily meet their circumstances.

P.S. In the case of the Rattan Instructor, information is requested as to whether his bonus on output is to be continued as this measure has so far met with very considerable success. Last year's bonus is long overdue and the delay in payment is causing much dissatisfaction and consequent difficulties in working.

I have the honour to be,

Sir,

Your most obedient servant,

Sd. H.G. Alaerton.

Superintendent.

STATEMENT SHOWING THE PRESENT PAY OF THE INSTRUCTORS

AND THE PROPOSED SCALE.

I & C 219-24-2R

SIR,

With reference to your letter No: I.C.4859/I&C.219-24-2 dated 20-1-1925, requesting me to submit proposals on the enhancement of the scale of pay of the Instructors of the Chamarajendra Technical Institute, Mysore, I have the honour to state that I have arranged to have the proposals submitted by the Superintendent, Chamarajendra Technical Institute, Mysore, considered by the Advisory Committee of the Institute and to get their recommendations in the matter. On receipt of the same, I shall submit my final proposals to Government for favourable consideration.

I have the honour to be,
Sir,
Your most obedient servant,

DIRECTOR.

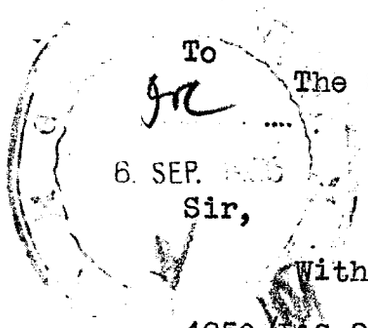
Office of the
Director of Industries and Commerce,
Bangalore, Dated the 28th August 1925.
5-a Sept.

From

P.G.D'SOUZA, ESQ., B.A., B.L.,
Director of Industries and Commerce in Mysore,
Bangalore.

To

The Secretary to the Government of Mysore,
Revenue Department,
Bangalore.



Sir,

With reference to correspondence ending with your letter No:IC. 4859/I&C.219-24 of the 25th January 1925 regarding the revision of the scale of pay of the Instructors of the Chamarajendra Technical Institute and the re-organisation of that Institution, I have the honour to state that the scale of each instructor is fixed separately and does not permit of any progressive increases being given with the result that the men have lost all incentive to good work. Moreover this scale of remuneration was fixed at a time when the wages of artizans were low and the Instructors are not able to command the respect of the boys they train when the boys themselves can earn as wages more than the salary that the Instructors receive. I consider it desirable therefore to group the Instructors according to classes and have the following grades:-

1	on	Rs 90/=
2	on	50-4-70/=
3	on	40-4-60/=
11	on	40-2-50/=
1	on	35/=
1	on	25-2-35/=
1	on	15-2-25/=
and 1	on	15-1-20/=.

As shown in the accompanying Proposition Statement this revision may be effected without any substantial increase of cost by the abolition of certain posts. There is a Draftsman who is treated as a part of the Clerical Establishment but his work is that of an instructor and provision has been made for him under Instructors. In addition to this Mr. Alderton considers it necessary to have a new Instructor for teaching papier machie and connected crafts. The Sales Clerk now gets Rs 30/=. I do not consider this remuneration

remuneration adequate inasmuch as he is required to furnish security and also the work is of a very responsible character. His pay may be fixed at Rs 40/=. The net result of these proposals will be an increase of expenditure by Rs108 9/10ths but this is absolutely necessary in order to improve the efficiency of the institution. There is likely to be a serious difficulty in future recruitment unless the scales of salaries are not adequately raised. In the Madras School of Arts recently the system I have now recommended viz.,not to fix the pay separately for each appointment but to have different grades of instructors so that there may be an even flow of promotion. has been adopted.

I have already submitted detailed proposals with my letter No: 309/C dated 1/4/23 regarding the re-organisation of this Institution and have taken the opportunity once more of examining the working of in thorough detail the Chamarajendra Technical Institute/and seeing what further revision it needs. The School had no regular syllabus and in consultation with Mr.H.G.Alderton the accompanying syllabus has been adopted with effect from the current year. The scholarships provided for the school are not adequate and proposals have been submitted to raise this amount from Rs8,000/= to Rs 10,000/=. At present the bulk of the pupils that come to the Chamarajendra Technical Institute are drawn from Mysore. This is not desirable for a spread of Arts and Crafts throughout the State is very essential and it is very necessary that pupils should be attracted more largely from the moffusil, The old moffusil scholarships should be revived and 16 scholarships at the rate of Rs10/= each distributed at the rate of 2 for each district for the benefit of the moffusil students should be provided. In case Government approve of the propos al to enhance the scholarships grant to Rs 10,000/= it would be possible to provide for this additional expenditure by suitable redistribution.

At present no proper examinations are being carried on in the Institution. Students used to be allowed to appear for the Madras Government Technical Examinations but this is not done systematically Arrangements will be made for a final examination on the completion

9

completion of each course and the award of a diploma. Separate proposals will be submitted on this point. The Chamarajendra Technical Institute has at present the following Workshops.

Smithy, ~~Foundry and~~ Carpentry. Rattan metalwork & Tailary & machinery

As regards the Smithy and Machine Workshop owing to other private concerns having come into existence there is a steady fall in the orders received. I have been considering whether it may be possible to close this workshop, but this is not possible as a certain amount of training in smithy is necessary in a Crafts School. Moreover, thereis no Engineering or other Industrial School in Mysore. The Section is being utilised by the Educational Department for Vocational Training in the High School. It is not necessary to treat this as a manufacturing workshop but regard it as a primary ~~adjoint~~ adjunct for training.

The system of payment to the Instructors by a system of bonus was introduced in the Chamarajendra Technical Institute and has been tried in the case of Rattan Instructor. The main reason why such a step was adopted was that it was expected to serve as an inducement to the instructors to increase the outturn in their respective sections. In an Institution whose primary object is the training of pupils there may be some danger of neglect in the instruction itself that is imparted to the pupils if the - - Instructors are made to understand that the efficiency of the work is to be judged by the quantity of the articles produced by them. I am therefore not in favour of the scheme of bonuses as the same result may be obtained by more efficient supervision on the part of the Superintendent who has been given the help of an Assistant Superintendent. It was my intention also to submit proposals to link up the C.T.Institute with the institutions at Sagar and Chennapatna but this may be deferred for the present as the lines of instruction are somewhat different. Facilities will be given to promising pupils from this institution with the help of the - - moffusil scholarships to undergo advanced training in the - - Chamarajendra Technical Institute. I request early sanction of

sanction of Government for the re-organisation of the Chamarajendra Technical Institute on the lines I have now recommended.

I have the honour to be,

Sir,

Your most obedient servant,

DIRECTOR.

THE INSTITUTE AND ITS AIMS.

The Institute was Established by the Government of His Highness the Maharaja of Mysore. the foundation stone being laid by His Imperial Majesty the Kind Emperor in January 1906.

The aims are, firstly to provide practical instructions in all those branches of Art, design and handicraft which have a bearing on the more necessary or artistic trades, so that the student may be assured a position as a necessary and responsible member of the community; and secondly to pioneer such new crafts or trades as may be expedient to the locality

Experimental work to further develop the Arts or Industries is also undertaken.

The Instruction, therefore, is framed to give the student the requisite training in each individual art or trade under commercial conditions. At the conclusion of the training --- Government offer facilities for the student to continue his career in the particular trade he has learnt.

The Art Instruction is applied to Ornamental and Decorative purposes. The number of students trained in Fine Arts only, is restricted.

The Courses of Instruction given are divided into three departments:-

1. Fine Arts
2. Artistic Crafts
3. Trades

Each with auxiliary courses in

a. General Education in English, Kanarese and Urdu up to a possible Lower Secondary standard, and

b. Pictorial or Mechanical Drawing, Modelling, Design and Draughtsmanship especially adapted to meet the needs of the particular trade or profession of the student.

c. Semi-Commercial Workshop where the student of Craft work or Trade, after finishing his course of training, is expected to continue for a further two years under practical trade conditions.

Five hours daily are spent in practical training and an hour in each of the auxiliary courses a. & b.

C O U R S E S.

FINE ARTS:-

Drawing
Painting
Design
Modelling
Sculpture
Terra cotta modelled figures.
Special classes for teachers in training

ART & CRAFTS:-

Inlaying
Engraving & Etching
Line blocks for reproduction
Wood Carving
Sandal wood carving
Lacquer painting
Papier Mache work
Screen painting
Decorative painting
Decoration of fabrics
Draughtsmanship
Mechanical Drawing
And several minor decorative crafts.

TRADES:-

Rattan cane furniture making
Cane basket making
Carpentry & Cabinet making
Upholstery
Smiths work
Fitters work
Brass work etc.

Proposed Courses.

Stucco or Mural painting
Pottery & Ceramics
Block printing of Fabrics
Leather work
Electro plating stippling
Typography
Plumbing
Painters & Decorative work
Hammered brass.

In addition to practical work and general education each course also includes the following minor items of instruction:-

Design & Draughtsmanship
Geometry & Perspective
Estimating costs of production
Knowledge & selection of Raw Material
Seasoning and preparation of Raw Material
Up to date toolsand their uses
Small machinery & labour saving devises
Finishing processes
Elementary Book-keeping
Historic design and ornament
Nature study
Hygiene & Health
Observation Study
And a general idea of municipal work, the local Government Industries, and the rights and obligations of good citizenship

One course only may be taken at a time: the hours of study being 7.30 to 11.30 A.M. and 2 till 5 P.M.

Students are admitted from the age of 12 years. The prescribed entrance form properly filled in, togehter with a guarantee for regular attendance from some responsible citizen, should be submitted. No fees are charged to students taking a course except in the Fine Arts section. All materials and tools are supplied, and all work is the property of the Institute and is for sale. Fines are levied for unpunctuality and absence.

Special conditions are applicable to students from outside who wish to take part of a course or a special combination of courses. The fee for those students will be Rs.

Bonafide students, from other Schools, wishing to study the Art Course, are taught for a fee of eight annas per mensem, on production of a certificate from the Head Master of their Schools.

The full course in the Arts & Crafts departments extends for five years, and that of the Trades for three years, with the exception of Cabinet Making, + Rattan furniture making in which there ~~is~~ are ~~an~~ Advanced Courses for selected students of a further two years.

Examinations in each subject are held annually. Prizes are annually awarded for those obtaining the highest positions, and special prizes in particular subjects.

The following additional facilities are offered to students completing a full course of study.

(a). Foreign scholarships to enable selected students to continue their studies.

(b). Financial assistance and expert knowledge is available for opening small workshops.

(c). A diploma is granted certifying the various subjects in which the student has studied and the standard attained by him.

A Technical and Art Library is provided for reference. Students are expected to study in the Library from 5 to 6 P.M daily.

A Commercial Museum, comprising specimens of Indian products and the material resources of the State is also included.

The Institute is closed for the hot weather vacation from 15th April to the 15th May or approximate dates, and also during the Dasara and other special festivities.

The District Industrial and Trade Schools are affiliated with the Institute, their curriculum corresponds and the whole are united in one complete scheme of Industrial Education.

Advance Maintenance Scholarships are offered to enable Moffussil students showing real ability to attend the Advance classes of the Institute.

Such students may be transferred from the District Industrial Schools or should make an application with a recommendation from some recognised authority.

Practical Instruction, the drawing and Art Classes of the Middle and Higher Education are also connected with the Institute.

Special classes are organised to train teachers of Drawing, Art, Practical Instruction or Industry

CHAMARAJENDRA TECHNICAL INSTITUTE, MYSORE.

:-

S Y L L A B U S

FINE ARTS SECTION.

This course is primarily intended to be a training in Painting in Oil, water, or tempera colour, and all the allied subjects necessary to the training of an Artist, Drawing, or Art Teacher. It also includes draughtsmanship, lettering and illumination, design, clay modelling, sculpture and the artistic handicrafts.

The aim is to develop and establish the highest apprecation of beauty, to train all the faculties to observe and faithfully record the delight and charm in the harmonies of colour, delicacies of form, the subtle atmospherics and all the beauties of Nature and further to symbolise and portray beauty of thought by ideal composition.

This section is intended only for the training of students of special or hereditary ability in Art. The scholarships are strictly limited in this Section and are awarded to those obtaining the highest position in the examinations; general education qualifications of at least the Lower Secondary standard are insisted upon for all Scholarship students.

Students are admitted on payment of a fee of Re.1/- per mensem.

ELEMENTARY ART SECTION.

The Instruction in this Section comprises:-

Freehand or Outline Drawing from examples and also from nature, plant form and flowers, and common objects. The aim being to delineate the contours of any object by an expressive boundary line.

Light & shade or tone study This subject necessitates the portrayal of objects by a variety of tones only and without any boundary line. It is thus a more realistic means of expression than outline alone.

Elementary Design consists in decoratively filling geometric shapes with ornamental forms and colour.

Nature study consists in careful study in outline, tone or colour from plant, animal or bird form, with the ultimate intention of creating ornamental abstracts for in design.

Colour studies made in water colours of plant form and flowers, common objects, etc. and studies or combinations and harmonies of colour in design and the theory of colour.

Memory drawing in the above subjects is insisted upon.

Auxiliary subjects are Modelling to develop the sense of touch and true form. Perspective or study in the laws of vision and distance and Geometry.

General Education may be attended for one hour per day.

This course extends for nominally two years but students should pass the Examination in outline drawing before promotion into the Advance Classes.

ADVANCE ART SECTION.

The tuition in this section includes the following subjects:-

(Painting, Modelling & Etching being each a separate courses)

Studies from Nature in outline, colour or modelling.

Drawing in light and shade from the cast and Nature.

Tone and outline drawing from the antique (casts).

Painting portraiture and character studies.

Painting from still Life and Nature.

Landscape painting

Figure composition in line tone and colour.

Studies in tone of draperies.

Artistic anatomy

Studies of Historic ornament.

Principles of ornament

Flat tone of studies or ornament

Advanced design with regard to technical limitations.

Applied design and handicraft work

Animal and bird studies & painting from the Zoo

rspective and Geometry.

(Contd.

(Advance Art Section)

Memory and observation studies are made in each of the Advance subjects.

The course in Modelling comprises practice in the same subjects and includes Stone Carving, Modelling for terracottan and artistic cement work.

=======

ART & CRAFT SECTION.

Students with special artistic ability or hereditary talent are admitted to this section. The aim is to associate the highest artistic talent with practical products in the handicrafts for which India has ever held a foremost position for excellence.

Time honoured traditions are practised and skill and delight in colour harmony and the beauty of material is encouraged. The charm of decorative design and painting is assiduously sought by a close study of Nature and Art.

Modern tools and labour saving appliances are used in all cases where the drudgery can be taken out of the common-place itmes of work without jeopardising the artistic beauty of the product.

Auxiliary subjects of Drawing, Painting, Design, Geometry, Perspective Modelling are practiced one hour per day.

INLAYING

The Instruction includes the preparation of decorative inlays of coloured natural woods, sandal, ivory, mother of pearl, coloured neoloid, horn, various metals etc; inlaying the same, drawing of strings, ground sinking, engraving the finished inlays, polishing etc the expansion and contraction of materials due to climatic influences and obviated by proper methods of seasoning: special adhesive materials are prepared and used. The aim of perfect shaping and fitting of inlays is strictly inculcated and the use of any filler to rectify slovenly work, is rigorously prohibited.

Desings in floral, geometric and figure subjects, in harmonious colourings, applied to utilitarian purposes are inlaid and suitaoly engraved).

engraved in all sizes. Labour saving power machinery is used and demonstrated.

HORN WORK.

Carved horn and ivory work is carried on in conjunction with inlaying/articles for all useful purposes are prepared, carved and inlaid.

WOOD CARVING.

The Instruction includes carving of various types & colours of timber including Rose wood, Teak, Sandal and jungle woods, and knowledge of the necessary treatments and methods to meet the difficulties of the grain and obviate the faults of the material, or to demonstrate the possibilities of combination of coloured woods or other materials. The Instruction begins with chip carving and extends through outlining and pattern grounds. low and high relief, and carving in the round of ornament, natural forms, the human figure, and religious statues etc

The various methods of colouring and darkening timbers, fuming, oiling etc. and other finishing processes.

Precise clean chipping with sharp tools is the aim and the use of sand paper (except for smoothing large plain surfaces) is prohibited.

Clay or wax modelling and drawing in light and shade are auxiliary features advocated.

ENGRAVING.

This section includes several allied subjects:-

Wood Engraving
Metal "
Etching
Die Sinking
Line block preparation.

Clear precise and exact delineation is of the utmost importance

importance and thus the preliminary tuition includes considerable practice in line drawing and lettering

The early practice in engraving is made on type-metal plates and extends through the baser to the more precious metals

Line blocks in wood or metal, decorative engraving of patterns or monograms, cyphers, inscriptions, ornamental lettering of all periods artistic etched plates or decoration. Landscape, figure or portrait subjects, are prepared for all printing purposes

Dies are also sunk for various stamping purposes. Proof printing in one or more colours from the prepared blocks is made and the methods demonstrated.

BRASS & DECORATIVE ~~BRASS~~ metal WORK.

The course includes the practice of decorative and domestic metal work in brass, silver, copper and alloys, the manufacture of fittings for building, wood work etc. the preparations of large scale work such as doorways, gopurams and hoons, and large and small religious figures and shrines etc. All the work undertaken is of practical utility or decorative value, high duality of finish and design being the aim.

The Instruction includes wax moulding, pattern making, various casting preparations and methods, the differing composition of alloys of metals and their peculiarities, sheet metal work, tools, solders, preparation and rolling of metal sheets, draw plates, rivetting, cores turning, pattern puches, dies, the preparation and care of tools, polishing, burnishing lacquering, colouring, gilding etc

DECORATIVE PAINTING.

The following subjects are included under this course:-

Lacquer painting
Papier Mache Work
Screen Painting
Stencilling
Marquetry
Wood Staining
Decoration of Fabrics
Arts adapted to mural & domestic decoration
Fresco Panting.

The Instruction includes designing, drawing, painting, nature study and decorative painting especially adapted to these crafts, the preparation of the foundation in wood, papier mache', fabric, metal or pulp, the colouring materials, tools and stoving apparatus etc. and the rectification of the technical difficulties or limitations of material.

Practice is applied to the production of brilliancy, clarity and harmony of colours, perfect and durable lustre and charm of design and decorative appropriateness.

=======

The following items are common to all subjects in the preliminary stages of Instruction.

Necessary knowledge in connection with the use, care of and methods of preparing, adjusting and keeping tools in order.

Effect of climate and weathering of material, rectification of the difficulties arising from the grain or structure of material, preparation of, storage and seasoning of material, estimating costs of production and draughting designs.

Quality and perfection of workmanship are the aim, together with elegance and comfort in design and a high durable finish. As soon as the student can use his tools efficiently a Scholarship be awarded

This section is equipped with up to date machinery driven by ~~is~~ electric motive power.

The latest type of Seasoning Kiln with super heated steam apparatus is installed:also a power log cutting saw, pottery kiln etc.

CABINET MAKING - 4 YEARS.

The course extends for four years, beginning at the simplest uses of tools for chipping, levelling, planing, the easiest jointing etc; it extends to the construction of larger types of furniture, more intricate jointings, methods of finish and polish, practice in the manufacture of School, Office and Domestic furniture, mechanical drawings, design, estimate of the costs of production. The higher classes also practice the uses of power machinery

The ordinary course concludes with two years practice in the Carpentry Workshop under commercial condition with payment of labour.

Students who show exceptional ability, are eligible for a

further two years training in the Advanced Cabinet and Upholstery classes

ADVANCE CABINET MAKING - 2 YEARS.

The Instruction in these classes is for selected students only and consists of the preparation of the highest class of Cabinet Making, superior finish and polish, use of choice material with consideration to their strength, beauty, durability, quality etc: design of furniture with regard to the principles of comfort lightness, elegancy, durability and other structural principles, development of students our ideas and abilities, practice in the use of the latest types of tools and of power driven machinery: estimating of costs of production: Economy of labour and construction.

One hour a day is spent in Wood Turnery.

UPHOLSTERY - 2 YEARS.

These classes are for students who have already attained proficiency in Cabinet Making or Rattan furniture work. The Instruction consists of a complete knowledge of the tools and materials, the uses and preparation of cushions, mattresses, bolsters, edgings, gymps, webs etc: and practice with the same in the Upholstery of the better classes of furniture in either wood or cane from simple padding to the more luxurious spring finish: Design and estimate for Upholstered furniture.

RATTAN CANE WORK.

The materials used are solid canes from the State Forest. These are immune from the ravages of insects and far more durable than bamboo. Singapore cane and solid brass fittings are used as auxiliaries.

Instructions consists of cleaning, seasoning, and preparing the cane adjustments in drawing strings, colouring, bending, the theory and practice of strength and supporting features.

Beginning with small trays, flower baskets and chair seats:

and cots, the instruction/ue advance classes [illegible] the construction of high class cane furniture of al/rieties and designs and concludes with upholstered cane proc.

High class durable w/is the object with excellence of simple design and a minim/f added ornamental features.

S/T.H.Y

The section is wel/ipped with all the necessary power machinery and mechanica/blown forges etc.

The Inetruction co/sts of the theory and property of -- malleable metals, test/ the quality of metals, tempering, case hardening, annealing, /tting, swaging, welding etc. The preparation of all tools/l machinery parts, fittings, locks, chairs and general re/s to all classes of metal work.

TERS WORK.

The Instruction/ludes a thorough knowledge of the principles of construction, use/ tools, the correct cutting and filing angles and the principles /e followed in the improved design of tools.

The units of c/truction in the various common types of machinery and their/es demonstrated, methods of adjustment, -- lubrication, value/ packings, friction, heat expansions, hardening, tempering, st/gth of metals etc.

Fitting of m/inery, assembling of parts, adjusting, cleaning belting, gearing, /lleys, clutches, trusses and the rules and practice of effic/t engine driving

Turnery is /luded in the advanced syllabus, with practice on both foot and/rew cutting power lathes etc.

The accuradof fitting is in all cases inculcated and the drawing and read/g of plans and mechanical scale drawing taught.

Offg. Director.

SDN)

Letter No.1746/481 dated 2-4-25, from the Superintendent, Chamaraj endra Technical Institute, Mysore, to the Director of Industries and Com merce in Mysore, Bangalore.

I have the honour to forward the draft prospectus of this Institute for your scrutiny, revision, and early submission to Government.

It has been circulated to the Members of the Committee and passed without revision.

May I request your considefation of the following matters:-

Re: affiliated Institutions

Schools of Trade & District Industrial Schools.

I suggest that the District Industrial Schools and Trades should be included, as being a necessary part of our scheme of Industrial Educa tion, special students being sent up from these Schools with a Moffussil Maintenance Scholarship for Advanced Training and the District Schools being inspected or visited once per annum.

Practical Instruction.-

In the Bombay and Madras Presidencies and United Provinces all the drawing and practical advanced classes are placed under the jurisdic -tion of the Central Art Schools, who set the curriculum, make annual inspections etc.

As the District Industrial teachers, and the Drawing teachers are trained here and the scheme for Practical Instruction and Trade Schools was drawn up under our authority, it would be beneficial to correlate the whole of these classes in the State in a similar manner, vide G. O.11180-250/Edn.498-20-1 dated 25th August 1921. This scheme would have much influence in directing the attention of the Public to Industrial work and prospects, it wouldeenthuse the boys with a partiality for Industrial occupation at the only period of their lives when this is possible, and touch a vast section of the population which cannot at present be influenced by Industrial Schools. The excess of 3 crores of imported of manufactured goods indicate that the Education in the State is much too literary and the urgent necessity for Industrial propagation.

Special classes for the Training of teachers of Art.-

There should also be a special class in the Institute for teachers of drawing and as in Europe, it should be obligatory for all teachers to take the subject.

Supervision/

Supervision of the Drawing classes or Art training of the Middle or Higher Education. This is one of the chief Educative factors its practice inculcates the habit of intense observation and retention of external phenomenon and rectifies the lethargic attitude --- which is the result of over much literary study. At present it seems to be very seriously neglected and from the little I have seen, I think the subject, not being embodied in the Examination list, is not seriously included in the Educational curriculum.

Although all these classes do not actually come within our Department, yet there are none in the State with higher qualification in these subjects than the staff of the Institute and therefore, none so capable to rectify and reorganise these very important subjects. Even if funds and staff do not at present permit these measures, I consider their adoption of so great an importance in Education, that their ultimate organistion is certain and therefore, their inclusion in the present prospectus entirely justifiable.

Advanced Classes in Rattan furniture work.-

An additional 2 years course as proposed in my letter No.1435/402 of 18-2-1925, is very necessary, particularly in view of our proposed Rattan development. The curriculum of the classes has expanded and developed so greatly that it cannot now be taught in the ordinary 3 years course and is only picked up by some of the boys in the Workshop period which is contrary to all principles, of their Education or Commerce.

Scholarship of Craft Classes.-

It is said to be the particular obligation of the Institute to develop the indigenous Arts and Handicrafts and yet it is paradoxical that the scholarship of these classes are only half the value of those in all the other sections, thus placing their development under a most serious handicap.

I have recommended the rectification of this in my letters of 183/64 of 28-7-1924, etc, and although the matter has apparently not yet received sanction I have included it in the Prospectus in anticipation, as this measure is obviously necessary.

I have included photos of some of our productions, as at least one half tone block is necessary to show the high standard of our training, adds a very much higher class tone to the whole publication

and /

and ~~realise~~ raises it definitely above the ordinary.

The Member of Government assured me that he would sponsor the publication if I would write this matter up and therefore, I anticipate no difficulty regarding the necessary funds and request that you will push the matter through early, if possible before the prize-giving of next Birthday. Kindly acknowledge receipt of the Draft prospectus.

Dear Sir,

It seems very long ago that we talked over the necessity for a proper prospectus of this - Institute, 1924 I think, and you kindly said that if I made it out you would take an interest in - getting it printed.

The papers were compiled over a year ago, passed by the Committee and sent up officially.

After some delay they were said to be lost, and were again typed up and submitted for approval. These long delays are so stifling to the flame of ones enthusiasm.

Now they are said to be still waiting the sanction of Government and I should be very glad if you would kindly direct that the printing may

WC 1889—GPB—10000—18.7.21

GEN. & REV. DEPARTMENT
10 JUN 1926
INDUSTRIES & COMMERCE

Copy of D.O. letter No.2414/495 dated 29th June 1926 from the Superintendent, Chamarajendra Technical Institute Mysore, to the Director of Industries and Commerce in Mysore, Camp Mysore.

Referring to your D.O.No.C.53 dated 26/27th instant, I find that no memorial has been submitted to the Dewan by the Instructors - but only a request for an interview.

The matter of their grievances relates to the very protracted delay in considering the rectification of their scale of pay. It has passed through many phases each with much delay and correspondence as follows:-

(1) The first application was made in 1920, after much correspondence the matter was -

(2) Referred to the Committee and strongly recommended by them as necessary.

(3) A joint memorial by them to the Director of Industries and Commerce was returned as against the rules.

(4) They seem to have also interviewed yourself and

(5) Mr. D'Souza upon the matter.

(6) Mr. D'Souza also made up a progressive scale for the Instructors, but to all the many applications there has been no reply from Government and no revision of pay.

Many of these Instructors are paid less than a cooly in their trade although they are very skilled artizans. After such long service they do not like to leave the Service whilst there is some faint hope of justification.

I know, and have reported many times, that they are all very hard pressed by dire necesity and as the official channels of communication have failed to bring them any amelioration of their unfortunate circumstances after these many years of waiting, their extreme poverty and misery force them to seek any possible means of rectification and they have attempted to approach the Dewan Sahib

with the hope that he would at least order a just investigation of the matter.

I do not consider that any stigma can attach to us as the matter has been treated sympathetically and due reports and applications forwarded to Government, and every effort made for redress, but it is unfortunate that Government seem to have taken no action upon a matter in which the need for revision is so urgent and patent to all.

I feel that the dissatisfaction caused by the long delay is very detrimental to the work of this Institute, but under the circumstances, I am quite unable to prevent it and request that the matter may be placed for the earliest consideration.

OFFICE OF
THE SUPERINTENDENT

Ref. 2252/456
Enc. prospectus

CHAMARAJENDRA TECHNICAL INSTITUTE,
MYSORE, SOUTH INDIA,

10th June 1926. 192 .

To

The Director of Industries & Commerce in Mysore,
B a n g a l o r e.

Sir, Re. Prospectus.

In relation to letter No.I.S.1472 dated 5/6-4-1926 forwarding the draft syllabus for scrutinising whether it is in accordance with the standing orders of Government.

To the best of my knowledge it contravenes no standing order of Government, but my knowledge is not very extensive in this subject. If there is any consolidated publication relating to such Govt.Orders in connection with Technical Education, would you kindly forward a copy for reference or otherwise, the prospectus may be submitted for revision to some office in closer touch with

such orders and rules.

May I refer you again to my letter No.1743/481 of 2-4-1925 with which the original draft prospectus was submitted and which may have some bearing in this matter

The Advance Class in Rattan Work, to teach furnitur making, is so necessary that it should be included in - anticipation of Government sanction, as it is an absolutely neces/sary feature. Cane Furniture has now been made in the Workshop for the past 7 years and has developed considerably that other States wish to send students for Training in it, but until it is included as a training class in our curriculum, the industry has no justifiable position in the Institute or prospectus at all.

The Commercial Museum has now been separated from our charge.

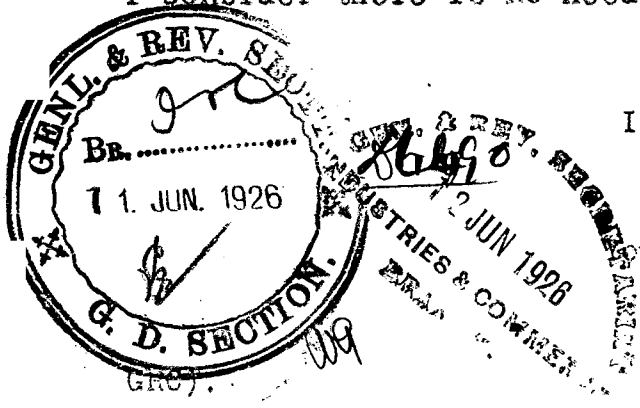
The clause on page 4 "the Drawing & Art classes of the Middle and High School Education" are also connected with the Institute" may be deleted if thought necessary. Our connection is the training of Drawing Instructors and preparation of models etc. at present.

Ptc 219-24-8

The publication also requires at least one half tone plate of a group of our productions including as far as possible, one ~~xxx~~ from each class, to give an idea of the excellence of our work and Instruction, and this may be taken when the draft is at ~~prest~~ last - approved. The list of Staff has been revised to date

My paper on reorganisation of Industries to Technical Education does not seem to have found favour and there unfortunately seems no need to revise the Prospectus in the light of such Ideals at present.

The Committee having approved the draft once, I consider there is no need for further revision.



I have the honour to be,

Sir,

Your most obedient servant,

Sd.H.G. Alderton.

Superintendent.

3. Correspondence ending with letter No. G.717/J.S. dated 17th January 1927 from the - Director of Industries & Commerce forwarding the opinion of the Visiting and Advisory Committee of the C.T. Institute on the scales of pay recommended by the Director.

....

Order No. D. 8073-4

Dated Bangalore, 21/3/27

The Director of Industries and Commerce has submitted proposals to revise the pay of the establishment of the Chamarajendra Technical - Institute, and these have been generally approved by the Advisory Committee ~~which suggests~~ with slight modifications. ~~which have been accepted, with the exception of a suggestion that bonuses might~~

~~be granted.~~ The effect of the revision will be to give the staff a small increase of pay and ensure an even flow of promotions in future. The extra expenditure involved is about Rs. ~~117~~ 115 per mensem.

Government consider that a revision of the establishment of the Institute is necessary, and are pleased to sanction the proposals of the - Director of Industries & Commerce as modified by the Advisory Committee. The extra cost resulting from the revision is about Rs ~~3,104~~ 3380 per annum as shown in the statement attached.

The revision of pay sanctioned in this order will come into effect from 1st March 1927. The Director of Industries & Commerce is requested to suggest a reappropriation from out of the sanctioned grants to the Industries and Commerce Department to meet the small extra cost resulting from the reorganisation, during the rest of the current year The Comptroller is requested to include necessary provision therefor in the budget estimates for the next year.

READ—

Government Order No. 8891-3—Edn. 45-16-27, dated 5th May 1917, sanctioning the revision of the courses of study, the scale of Scholarships and the scale of establishment in the Chamarajendra Technical Institute.

2. Letter No. G. 253—I. S., dated 5th September 1925, from the Director of Industries and Commerce, submitting proposals for the revision of the scale of pay of the Instructors of the Chamarajendra Technical Institute and for the reorganisation of the Institute.

3. Correspondence ending with letter No. G. 717—I. S., dated 17th January 1927, from the Director of Industries and Commerce, forwarding the opinion of the Visiting and Advisory Committee of the Chamarajendra Technical Institute on the scales of pay recommended by the Director.

ORDER No. D 8073-4—I. & C. 219-24-10, DATED 21ST MARCH 1927.

The Director of Industries and Commerce has submitted proposals to revise the pay of the establishment of the Chamarajendra Technical Institute, and these have been generally approved by the Advisory Committee with slight modifications. The effect of the revision will be to give the staff a small increase of pay and ensure an even flow of promotions in future. The extra expenditure involved is about Rs. 115 per mensem.

Government consider that a revision of the establishment of the Institute is necessary, and are pleased to sanction the proposals of the Director of Industries and Commerce as modified by the Advisory Committee. They are not in favour of introducing the system of bonuses recommended by the Committee. The extra cost resulting from the revision is about Rs. 1,380 per annum as shown in the Statement attached.

The revision of pay sanctioned in this order will come into effect from 1st March 1927. The Director of Industries and Commerce is requested to suggest a reappropriation from out of the sanctioned grants to the Industries and Commerce Department to meet the small extra cost resulting from the reorganisation, during the rest of the current year. The Comptroller is requested to include necessary provision therefor in the budget estimates for the next year.

N. RAMA RAO,
Secretary to Government,
Development Departments.

To—The Director of Industries and Commerce in Mysore.
The Comptroller to Government, through the Financial Secretariat.

Proceedings of the Govt. of H.H.
the Maharaja of Mysore.

Read -

6 G.O. No.8891-3/Edn. 45-16-27 dated 5th May 1917 sanctioning the revision of the courses of study, the scale of scholarships and the scale of establishment in the C.T.Institute.

D — 2. Letter No.G.253/I.S. dated 5th Septr. 1925 from the Director of I.& C submitting proposals for the revision of the scale of pay of the Instructors of the Chamarajendra Technical Institute and for the reorganisation of the Institute.

C in lines file 3. Correspondence ending with letter No.G.717/I.S. dated 17th Jany.1927 from the Director of I&C forwarding the opinion of the Visiting and Advisory Committee of the C.T. Institute on the scales of pay recommended by the Director.

Order No.

Dated, Bangalore, 1927.

The necessity ~~is~~ was being pressed upon the attention of Government ever since 1923 but the question could not be taken into consideration mainly for want of

funds. The Director of I & C reported so far back as Sept. 25 that the salary of the instructors of the Institute is in many cases less than the amount earned as wages by the boys trained by them and that this had affected the efficiency of the staff of the Institute.

The Dr. of I & C has submitted proposals to revise the establishment of the Chamarajendra Technical Institute, and these have been generally approved by the Advisory Committee, which suggested slight modifications, which have been accepted, with the exception of a suggestion that bonuses might be granted, the extra expenditure involved is about Rs.117/- per mensem.

Govt. consider that a revision of the establishment of the Institute is necessary, and are pleased to sanction the proposals of the Director of I & C as modified by the Advisory Committee. The extra cost resulting from the revision is about Rs.1404/- per annum as shown in the statement attached. The effect of the revision will be to give the staff a small increase of pay and ensure an even flow of promotions in future.

Govt. do not consider it necessary to grant bonuses to the staff as recommended by the Advisory Committee.

The revision of pay sanctioned in this Order will come into effect from 1st March 1927. The Director of I & C is requested to suggest a reappropriation from out of the grants sanctioned to the Industries and Commerce Department to meet the small extra cost resulting from the reorganisation, during the rest

of the current year. The Comptroller is requested to include the necessary provision therefore in the budget estimates for the next year.

Secy to Govt. Dev. Deptts.,
